

LEASEWEB

Acronis Backup

Leaseweb Acronis Backup is a fast, scalable, and reliable backup solution that protects your files, applications, and complete systems. By partnering with one of the leading names in backup solutions, we have made it easy to incorporate cloud data protection into your infrastructure setup for Leaseweb Elastic Compute, dedicated servers, and VPS services.

LEASEWEB

Acronis Backup

Why Choose Acronis Backup

Easy to Manage

Stress-free backup management that is easily deployable and scalable through an intuitive web-based console

Unparalleled Data Safety

Data is encrypted both in transit and at rest and is secured in our SSAE-16 certified global data centers

Features

Backup and Recovery

- Flexible and scalable cloud backup
- Disk image file-based backup
- Off-site backup to the cloud
- Recovery of any platform from cloud or dedicated servers
- Backup and recovery of selected files, folders, volumes, or a complete system
- Backup of Windows® and Linux® servers
- Backup of Microsoft SQL Server®, Exchange, SharePoint® and Active Directory®
- Granular object-level recovery for Microsoft Exchange and

SharePoint databases

- Incremental and differential backups, as well as deduplication and compression
- Disk-to-disk-to-cloud backup staging support
- Acronis application-aware restore provides database-level recovery of Microsoft® Exchange, Microsoft SQL Server® and System State backup
- Active Restore copies only the files you need so you can start working before a restore is complete

Monitoring

- A single console protects all data at its storage location
- Customized backup and retention policies
- Self-service backup monitoring
- View activities and alerts in one central dashboard

Security

- SSAE-16 certified global data centers
- 2048-bit SSL management channel encryption
- AES-256 data encryption in transit and at rest
- Increased security with network-based login restrictions
